

## Barracuda Cloud-Based Archiver

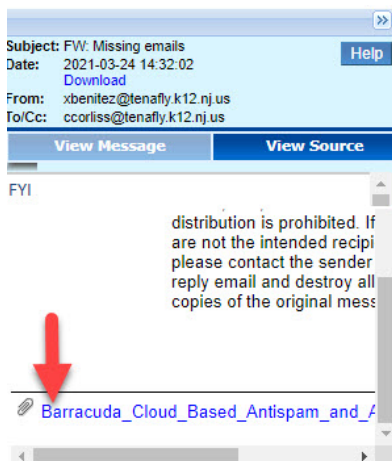

To retrieve previously deleted email messages or to simply search for any message you received while working at Tenafly, use the Barracuda Archiver. **Log into <https://mas.barracudanetworks.com> using your email id and password to access your personal archived emails.**

Barracuda lets you look up or restore any archived emails and attachments. Click on “Advanced” next to the “Search” button to customize your search and find any email, contact, appointment, etc. from within your mailbox.

The search returns a list of results. You can then select any specific email and click “Resend to me”. Or to open an attachment without resending the message to your inbox, go to the reading preview screen on the right and scroll to the bottom of the preview message. Click on the attachment, indicated by a paperclip, to open it.

More questions? Click on “Help” in the upper right corner for additional answers and information.
